REPORT OF PRINCIPAL AND SCHOOL IMPROVEMENT COUNCIL

High schools and universities across our state and nation face the challenge of producing graduates who are prepared to work in the fields of science, engineering, mathematics, and technology. As such, we have made it a goal to develop a program that would afford interested students increased rigor in these particular areas. During this school year, our staff has focused on several initiatives and taken part in professional training sessions in order to help better prepare the students of Wilson High School. We have taken part in Nine Schools Project, High Schools That Work, Cultural Diversity, and The National Network of Partnership Schools professional development training.

As we look toward next year, Wilson High School will work to maintain improvements in home-school communication and focus on programs that will help us to meet the diverse needs of a growing student body. We are most fortunate to have a faculty and staff that looks at student achievement beyond what is measured on standardized tests. Wilson High School will continue to embody a strong commitment to the overall development of students, allowing them to experience success in and out of the classroom while providing them with opportunities to develop character and responsibility needed by those who are the future of our communities, our state, and our nation.

We are proud to proclaim that our students, with the encouragement of a caring faculty and supportive alumni, forged their mark in Wilson history. Some of our outstanding accomplishments include the following:
